

6" Yamaha Lift Kit

Fits Models: G-22

Note: This is a bolt-on lift kit. Offset wheels are recommended.

-FRONT LIFT Instructions-

Raise cart & support frame w/ jack stands. Remove front bumper. Remove tie-rods from steering arms. Remove shock w/ spindles from factory A-Arm. Remove factory A-Arms. Install new A-Arm plate to the original A-Arm mounts. (F=Front of cart). Mount upper shock bracket to shock tower upright (R-right side L-left side). Drill 1/2" through hole on bottom shock mount for new 1/2" bolt (see diagram). Install shock to upper bracket and to A-Arm. Install factory spindles on new front end. Install new steering risers on top of factory spindle arms (D=driver side P=passenger side) Install tie-rods to new risers.

Now you are ready for adjustments:

Mount tires. Lower cart to the ground. Push cart back & forth to get suspension to seat. Adjust camber using 2" square on side of tire to floor. 1/2" gap in at bottom. This is done by sliding upper shock bracket up and down. Adjust toe in 1/8" (Use straight edge on side of tires, measure behind tire & then adjust 1/8" in on front of tire.

Note: Drive cart around then check adjustments. Repeat adjustments if necessary.

(View of front right passenger side)
